Foam Dilatation PROFILE T70/45

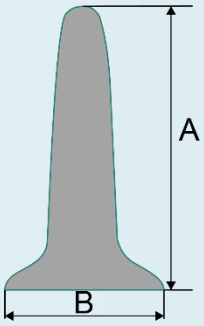

+ Self-adhesive tape 20mm

The Foam dilatation Profile T70/45 is a T-shaped PE profile and acts as an expansion joint.
T70/45 avoids large screed surfaces from cracking or fracturing.
The profile is made of elastic polyethylene foam (PE) with recycled content. It is easy to cut into the right size.

The self-adhesive strip on the base ensures smooth and stable installation.

Profile T70/45

Technical Parameters	
Colour	Grey
Density	27 – 33kg / m³
Thermal conductivity at 40° C	0,04 W/(mK)
Maximum operating temperature	90° C
Short term absorbability	2 %

TYPE	Height (A)	Base (B)	Thickness	Length	Packaging pcs/box	Packaging m/box
T70/45 + 20mm tape	70 mm ± 2%	45 mm ± 2%	10 mm	2000 mm ± 2%	125 pcs	200 m

2050 x 600 x 400 mm
