ASTROFOAM®

With more than 50 years' experience in protective packaging, we understand better than anyone that having the right PE foam at the right moment is key. With over 17 factories in Europe, we have increased our supply reliability and speed of delivery.

ASTROFOAM® is a non-cross linked extruded polyethylene (PE) foam which can be fully recycled. This extruded foam has a closed-cell structure, providing high cushioning to prevent scratches and impacts. ASTROFOAM® is available in different densities, thicknesses and dimensions. **It is known to be shock-absorbent, scratch-resistant and flexible for any product.**

To serve our clients even better than before, we launch ASTROFOAM® standard sheets and standard rolls.

All these standard products are in stock and can be delivered immediately.

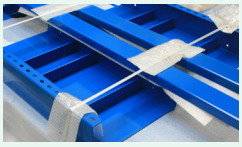

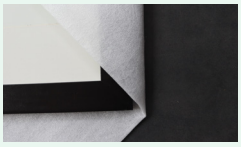

Of course, you can still order our non-standard sizes, fully adapted to your needs.

Properties of ASTROFOAM®

- Perfect protection against scratches
- Flexible
- Light and economical
- Dust-free and odour-free
- 100% recyclable
- Chemically inert
- Moisture resistant
- Anti-slip

CHOOSING THE RIGHT ASTROFOAM® TO DO THE JOB

1 DEFINE YOUR PRODUCT TYPE AND STYLE OF PROTECTION

Thickness	1 mm	1,5 mm	2 mm	3 mm
Applications	 Layers of foam between your products. Used for small and fragile products, such as lights, glass, etc.	 Wrap your whole products in foam. Ideal for protection of electronics (computers, camera's), painted parts, etc.	 Wrapping and protecting medium heavy and semi angular objects. Perfect for furniture.	 Wrapping and protecting heavy and angular objects, such as paintings, mirrors, etc.

2 CHECK OUT OUR STANDARD LOW DENSITY ASTROFOAM® ROLL SIZES

Thickness (mm)	Width of roll (m)	Length / Roll (m)
1 mm	0,50 m	500 m
	0,60 m	
	0,80 m	
	1,00 m	
	1,20 m	
	1,25 m	
	1,50 m	
1,5 mm	1,00 m	350 m
	1,20 m	
	1,25 m	
	1,50 m	

Thickness (mm)	Width of roll (m)	Length / Roll (m)
2 mm	0,50 m	250 m
	0,60 m	
	0,80 m	
	1,00 m	
	1,20 m	
	1,25 m	
	1,50 m	
3 mm	1,00 m	175 m
	1,20 m	
	1,25 m	
	1,50 m	

ALWAYS ON TIME

Now on stock in Western Europe!

✓ On stock ✓ Fast delivery ✓ MOQ* = 1

* Please consider transportation limitation

** 1 roll / package. Rolls of 0,50 m width are packed 3 per package, rolls of 0,60 m and 0,80 m width are packed 2 per package

ABRISO Jiffy

WE CREATE. WE SUSTAIN. WE PROTECT.

NOW ALSO STANDARD ASTROFOAM® SHEETS ON STOCK

These low density sheets with a thickness of 1mm are always on stock and immediately available.

AstroFoam® Sheets are specially designed for immediate use, which is why they are available in different standard sizes. While with rolls you still have to cut the right size, AstroFoam® Sheets always have the right and same size for your application. This is also why they are easy to handle.

NEW

Width x Height (mm)	Sheets/box 790 x 590 x 425 (mm)	Sheets/foil
200 x 300	2500	
280 x 380	1400	
380 x 580	700	
580 x 780		1000
800 x 1200 (1)		500
1000 x 1200 (2)		500

✓ Packed in boxes or foil ✓ MOQ: 1 pallet (6 boxes) or 1 foil package

(1) Our AstroFoam® Sheet of 800 x 1200 equals the size of a EUR pallet
(2) Our AstroFoam® Sheet of 1000 x 1200 equals the size of a CHEP pallet

ABRISO Jiffy
WE CREATE. WE SUSTAIN. WE PROTECT.

DO YOU HAVE SOMETHING SPECIAL TO PROTECT?

We've got you covered!

Custom Made Bags & Sleeves		ASTROFOAM® bags are used to protect all kinds of products, big or small. Our bags can be made in different sizes & qualities, depending on your needs. ASTROFOAM® bags and sleeves are mainly used as shock-absorbent packaging in transport or storage. For your electronic products, please see our anti-static foam bags.
Custom Made Sheets		ASTROFOAM® sheets are primarily used as shock absorbing intermediate layers. Beside our standard ASTROFOAM® sheets, we are able to make custom-made sizes according to your needs.
Macro Perforation		Perforated foam rolls are used for products that need to be water-permeable or condensable during transport or cold storage.
Laminates		Laminated foam products are designed to protect heavy, fragile products or products with sharp edges/corners. Example laminates are ALU PP, ALU PET, HDPE/LDPE foil (to ensure additional protections against tear and shocks), Kraft paper (to ensure discrete and safe shipment of your valuable goods), bubble wrap (ideal to protect your delicate products against impacts) and non-woven (protects against scratches on lacquered products), etc.
Tear-off Perforation		Tear-off perforation has the same advantage as sheets, but are supplied on rolls. This makes it easier to handle for some applications. Tear-off perforation can be supplied to your specific measurements.
Thermal Insulation		Thermal foam laminates are used to protect products against changing temperatures. The insulating properties of the foam layer, combined with a reflective layer (such as aluminium or metalized foils), make thermal foam laminates the ideal solution for keeping the temperature (warm or cold) of your product stable.
Short Rolls		Our ASTROFOAM® is also available in short rolls of 5-30m in length, ideal for the DIY market, house moves, small packing jobs or when larger rolls of foam are not required
Antistatic		Anti-static ASTROFOAM® protects sensitive electronic components and devices from electrostatic discharge for safe storage and transportation.

DIFFERENT ASTROFOAM® SIZES

Our ASTROFOAM® is also available in various thicknesses, densities, lengths and widths.

General Specs of ASTROFOAM® ROLLS
Thickness: from 0,80 mm up to 20 mm
Width: from 6 cm up to 250 cm
Length: from 5 m up to 1150 m
Density: up to 70 kg/m^3

General Specs of ASTROFOAM® SHEETS
Thickness: from 0,80 mm up to 20 mm
Width: from 6 cm up to 250 cm
Length: from 4 cm up to 1000 cm
Density: up to 70 kg/m^3

By selecting the right ASTROFOAM® and applying it correctly, you can significantly enhance the protection of your products during shipping and storage, regardless their size or fragility.
